PRESENTATION

By Kevin Mwithiga

WHAT I LEARNED

1. **Practical Integration:** Successfully connected the contact form to Formspree for real message handling.
2. **Responsive Design:** Created a layout that works seamlessly on mobile, tablet, and desktop.
3. **Interactive Elements:** Implemented smooth scrolling, clickable project cards, and feedback for user actions.

CHALLENGES FACED

1. **Vertical Alignment:** Fine-tuning the skills/resume divider required multiple CSS adjustments.
2. **Form Validation**: Ensuring proper error handling before Formspree submission took extra debugging.
3. **Cross-Browser Testing:** Minor styling inconsistencies appeared in different browsers.

FUTURE IMPROVEMENTS

1. **Enhanced Analytics:** Track user interactions (e.g., resume downloads, project clicks) with Google Analytics.
2. **Loading States:** Add spinners/animations during form submission for better UX.
3. **Dynamic Content:** Fetch projects from a CMS (like WordPress) for easier updates.
